The above information and images are for reference only. Please inquire for detailed dimensions, output specifics and/or additional information.

The measurements stated are taken at the listed ambient temperatures with a stabilized machine temperature, as per SAE J56.

\*Smart regulators additionally allow for tandem operation of any pair of alternators regardless of alternator model.

1. Idle output is estimated at 2000 alternator rpm and at 72°F/22°C.
2. Hot idle output is estimated 2000 alternator rpm and at 200°F/93°C.
